

Flutter Training

Architectural Patterns For Better State Management

Recap

Week #5 Recorded Session:

<https://drive.google.com/file/d/1A3yNXSZcvqeZ-OUdygksWcDfrd8PkCE8/view?usp=sharing>

Week #5 Presentation (Persistent storage and unit tests):

<https://docs.google.com/presentation/d/1VCQoXjbcs1PiJ1-hDw41y9il8sLIU-WSZbl7UxnKeFs/edit?usp=sharing>

VentureDive

Agenda

- State management In Flutter
- What are architectural patterns.
- Explore famous architectural patterns in flutter.
- Reactive Programming
- Some code walk through for better understanding of architecture pattern.

State Management

- Creating stateful widgets
- Maintaining states for each widget manually.
- Using simple `setState()`
- Is there a better way to manage it ?

Stateful widget

Architectural Patterns

- Why we use architecture patterns?
- Its Advantages
- Does it make your app scalable ?
- Is it helpful when you work with a team developer ?

Flutter Provider

- An implementation of observer pattern
- In which consumer waits of observable to emit changes using callbacks..

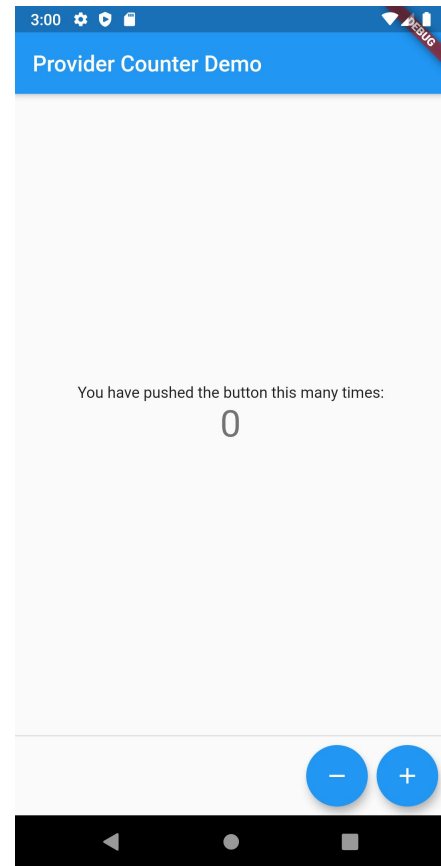

Main Concepts

- Notifier
- Provider
- Consumer

Code Walk Through For Provider

In a simple Counter Application

VentureDive

What is reactive programming

- Streams
- Async*
- yield

Bloc

A reactive support architecture
to update states based on streams

A graphic with a black background. In the center, there is a large, stylized blue 'X' shape. Overlaid on this 'X' is the text 'Flutter Bloc Pattern'. 'Flutter' is in white, 'Bloc' is in a teal color, and 'Pattern' is in white. The text is in a bold, sans-serif font.

**Flutter Bloc
Pattern**

VentureDive

Main Concepts

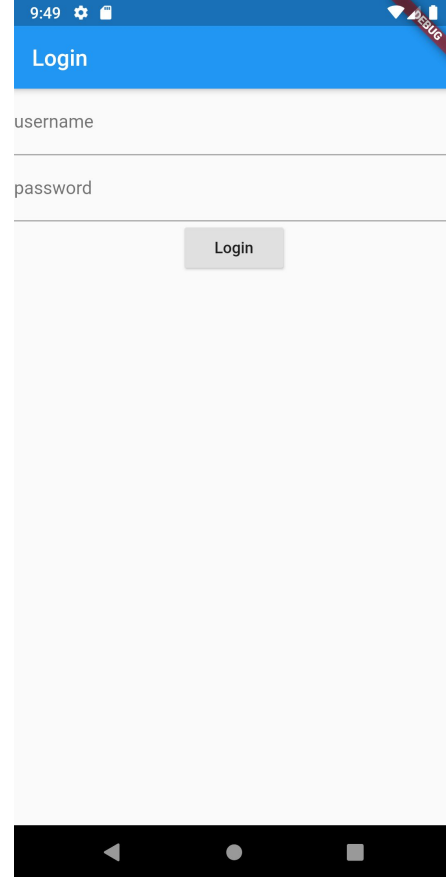

- Event
- States
- Bloc
- Bloc Builder
- Repository

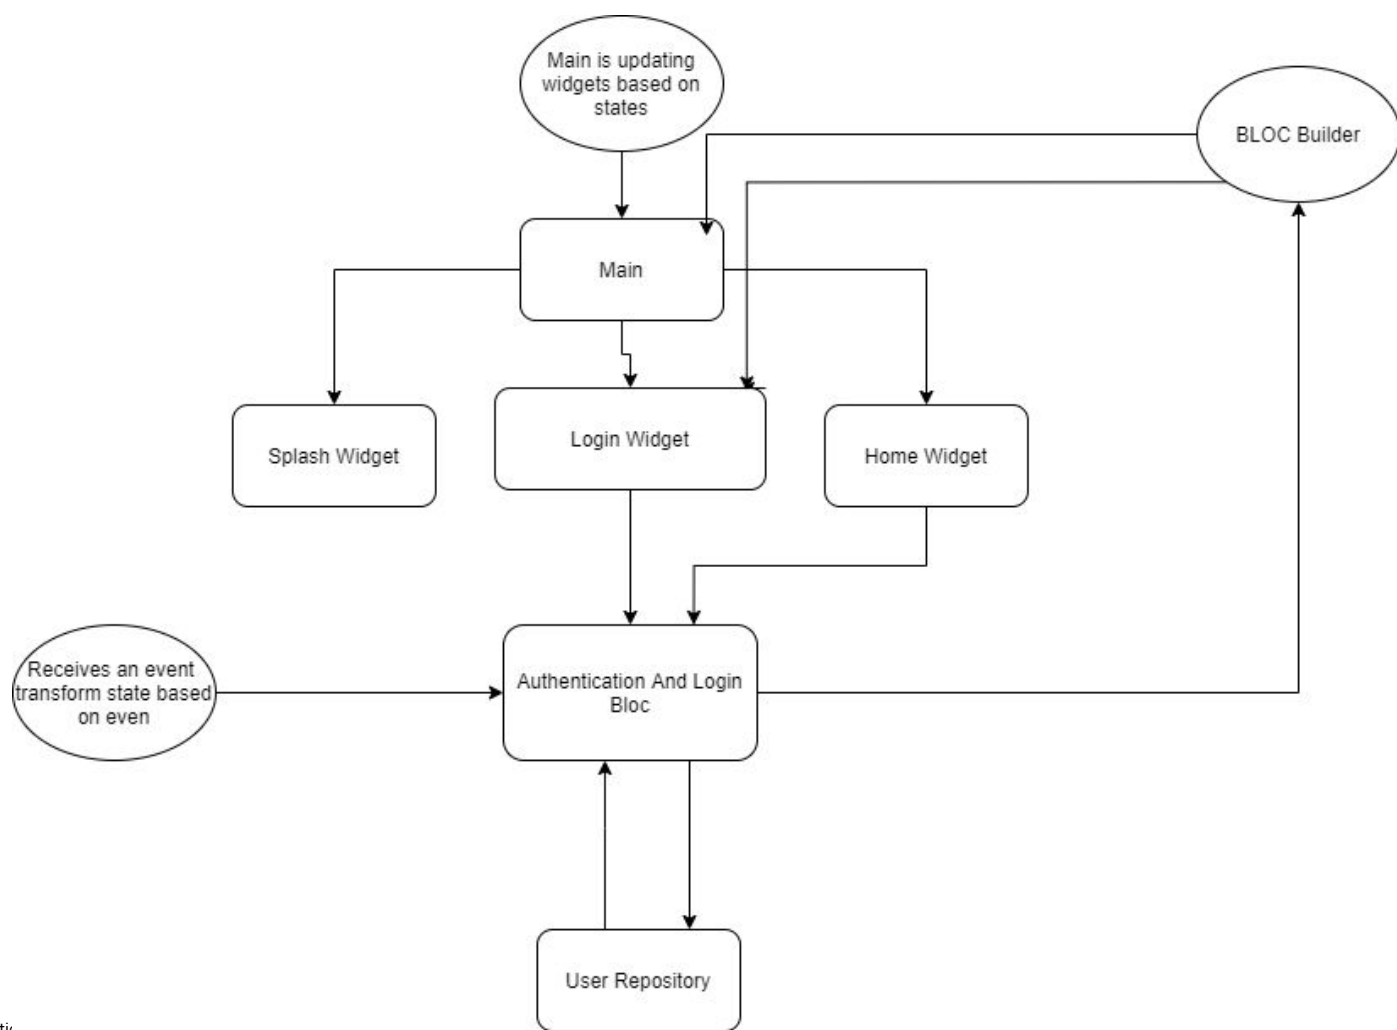

Code Walk

Through For Bloc

Creating Login Flow
